

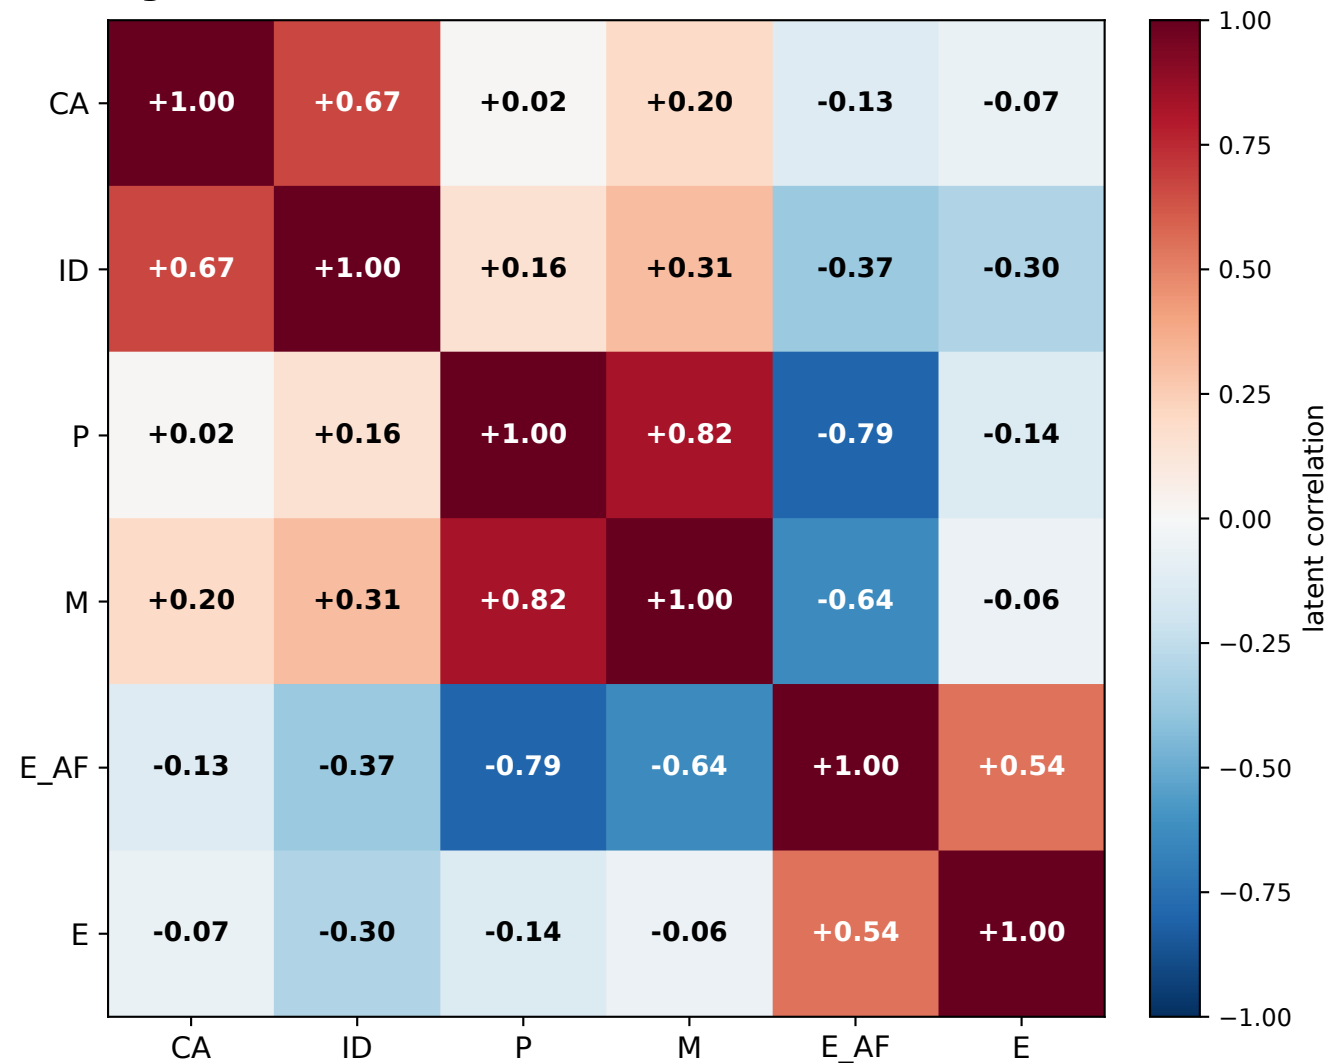

Figure 7. 6-factor latent correlation matrix (N = 710)

Key patterns: $r(\text{CA}, \text{P}) = +0.02$ (orthogonal axes); $r(\text{P}, \text{E_AF}) = -0.79$ (dominant non-empathy channel); $r(\text{M}, \text{P}) = +0.82$ (partial construct overlap — see Discussion on M-factor); $r(\text{E}, \text{E_AF}) = +0.54$ (affective/cognitive empathy partially shared).
